**ORDER YOUR FLOWEBULBS EARLY THIS YEAR
FLOWERS ARE NOW MORE ESSENTIAL
THAN EVER**

Stocks of all types of flowerbulbs are of good quality this year, but the supply is extremely limited, due to many obvious reasons.

For the duration we cannot import any bulbs from our nurseries in Noordwyk, The Netherlands; shortage of labor here, as well as in England and the urgent need for food crops, necessitated the curtailment of bulb plantings last Fall.

We have always advocated early ordering and particularly urge you to do so now, so that your order will be filled completely in the best available quality.

In order to cooperate with our Government, we have curtailed the size of our catalogue as much as possible, besides, many varieties of bulbs are no longer available. We assure you, however, that our selection of varieties represents the best obtainable at this time which is good enough at any time.

We shall be very glad to assist you in the solution of your garden problems, supplying planting plans and select the right varieties of bulbs, etc., if you will write us in detail.

All Prices in this catalogue are provisory.

OREGON GROWN NARCISSI or DAFFODILS for NATURALIZING

We sincerely believe that the jumble of a mixture of many types of Daffodils does not afford the delight of the solid colors of separate varieties at a distance, nor the distinction of these varieties at close range.

The effect attained by planting Narcissi in separate varieties, in clumps, like so many little islands strewn in the Ocean, of from 25 to 100 bulbs, is far more pleasing.

We have selected the following varieties, because they are particularly suited for naturalizing, blooming profusely over a long period and producing many new bulbs from year to year.

Bernardino	Page 6	Jonquilla Simplex	Page 11
Sir Watkin	8	Jonquilla flore pleno	11
Yellow Poppy	8	Actaea	12
Diana Kasner	8	Ornatus Maximus	13
Hera	9	Recurvus	13
Campernelle Single	12	Albus Plenus Odorata	13
Golden Sceptre	11	The Pearl	14

Consult pages indicated for descriptions and prices.

For those who insist on a mixture we suggest our

\$ 9.50 per 100, \$ 87.50 per 1000.

STANDARD MIXTURE. Containing all types.

\$ 7.50 per 100, \$ 72.50 per 1000.

YELLOW TRUMPET DAFFODILS

Trumpet as long or longer than perianth segments; trumpet lemon-yellow or sulphur-yellow, with perianth of same shade.

All Prices are for double-nosed Oregon grown bulbs only.

AEROLITE. Perianth lemon-yellow, petals overlapping, trumpet slightly darker, frilled. Beautiful Daffodil of great substance.

\$ 2.10 for 10, \$ 18.00 per 100.

BEN HUR. A glorious "loud speaker" trumpet, deeply frilled of pure Roman gold, $2\frac{1}{2}$ inches across at the mouth; in spite of its immense size the whole flower is finely proportioned, one of the best of the new giant trumpets.

\$ 3.00 for 10, \$ 27.50 per 100.

DIOTIMA. Considered by many experts as the very best of the new super-giant yellow trumpets; despite its huge size (perianth being five to six inches across) the whole flower is beautifully proportioned and is carried gracefully on flattened tapering stems, two feet tall, entirely free from the amaryllis-like stiffness of many of the giant trumpets; the broad overlapping petals form a star-shaped perianth of medium deep primrose, trumpet somewhat more deeply colored, undoubtedly one of the top-notchers for many years to come.

\$ 4.50 for 10, \$ 42.50 per 100.

DICK WELLBRAND. (2b) One of our finest introductions, very strong grower and exceptionally free-flowering. The perianth is pure white and the cup flame orange. One of its most remarkable qualities is that the color does not fade, but rather intensifies with age. The flower lasts unusually long and we believe that this variety will be of the greatest value both for greenhouse work or for outside. Its great beauty lies in the startling contrast between petals and cup which makes it stand out in the largest collection of daffodils. A worthy companion to Francisca Drake.
\$ 8.00 for 10, \$ 75.00 per 100.

FRANCISCA DRAKE. (2b) It is impossible to describe adequately the beauty of this unusual flower of a distinct new type; the pure white perianth petals are of unusual substance; an inch and a half wide, and tinted gold at the base, which shows through on the outside; the cup, wide and deep, is golden yellow at the base, changing gradually to flame orange at the densely frilled edge; the flowers are held well above the fine foliage and give the effect of a flock of white seagulls taking flight; strong-growing and very free-flowering. \$ 2.35 for 10, \$ 21.00 per 100.

(2b) Deservedly an international favorite; outstanding among the new *Incomparabilis* hybrids; flatly opening perianth, 4 to 5 inches across, with a flat cup nearly 2 inches in diameter, densely frilled, the perianth being pure white without trace of shading, and the cup lemon-yellow and fluted or shirred to the base, good neck, strong flower, free-flowering and a good propagator; one of the greatest daffodils of the present day and for years to come. \$ 2.25 for 10, \$ 20.00 per 100.

MILFORD HAVEN. (2b) Fine flower with cream-white perianth and wide cup ruffled and deeply frilled at edge, chrome yellow at base and shading into rich orange-scarlet, the same gorgeous color combination as in the *Montbretia*, "His Majesty". \$ 1.90 for 10, \$ 16.00 per 100.

RED CROSS. (2a) Famous throughout the daffodil world, extra large, strong flower, opening flat, primrose perianth, and deep yellow cup densely frilled, of deep orange, substantial and long lasting and fine both in the garden and for exhibition. \$ 2.25 for 10, \$ 19.00 per 100.

RED SHADOW. (2a) A most attractive flower of bold appearance. The perianth is creamy yellow and the cup is dark yellow, with orange-red margin. It is unusually free-flowering and a strong grower. Although one of the latest *Incomparabilis* types to flower, it forces well and is very attractive in pots. One of the best exhibition flowers \$ 2.90 for 10, \$ 26.00 per 100.

TRIUMPH TULIPS

With all due respect to the old Single and Double Early Tulips, it is now generally accepted, that the Triumph Tulips, with their much longer stems, very much sturdier growth and substance, are far better adapted to the American climate, therefore will last longer outside and also for early forcing give more satisfactory results.

The Triumph Tulips originate from crossing Single and Double Early Tulips with Darwin Tulips, which gave them the form and habits of the Darwin Tulips and they flower at the same time as the Early Tulips.

The peculiarly shaped roots, consisting of a large solid crown, with long, brown, fleshy roots branching out, should be planted not over 5 inches deep, resting on a layer of sand to secure drainage. In the border, the rock-garden, or for naturalizing in the woods it makes a lovely companion for the Daffodils, being in bloom at the same time, continuing into the month of May.

The roots should be planted immediately upon delivery, about two to three inches deep and without further care they will establish themselves and increase.
